What Is Fioricet?

Fioricet is a **prescription pain-relief medication** commonly used to treat **tension headaches and migraine pain**. It is a combination drug that contains three active ingredients:

- **Butalbital (50 mg)** – a barbiturate that helps relax muscle contractions involved in headaches.
- **Acetaminophen (300 mg)** – a pain reliever and fever reducer.
- **Caffeine (40 mg)** – a stimulant that improves blood flow and enhances the effectiveness of other ingredients.

Some variations, like **Fioricet with Codeine (30 mg)**, are available for severe pain but require strict prescription control.
