### **Important Safety & Responsibility Notes**

While the convenience is undeniable, Valium (diazepam) remains a **Schedule H controlled medication** in India and a **Schedule IV controlled substance** internationally. Responsible platforms will **always**:

- Demand a valid prescription
- Never sell without pharmacist verification
- Provide complete medicine information including batch number, expiry, and manufacturer details
- Offer pharmacist consultation when required

**Never** purchase from websites that:

- Offer Valium without prescription
- Have no physical address or pharmacist registration details
- Use unusually low prices (significantly below market rate)
- Have poor/no customer reviews or suspicious domain age

Remember: **Counterfeit diazepam** tablets are a serious risk – they may contain dangerous substances, incorrect dosages, or no active ingredient at all.

### **Who Benefits Most from This Modern Ordering Method?**

- Professionals with demanding schedules
- People living in remote/smaller towns with limited pharmacy access
- Elderly patients or caregivers who find physical visits challenging
- Individuals managing chronic anxiety who need consistent supply
- Shift workers whose active hours don't match traditional pharmacy timings
